LIANA BARATIAN

Computer Engineering Student | Frontend Developer & UI/UX Designer
Istanbul, Turkey | Lianabaratian7@gmail.com | LinkedIn | GitHub | +90 552 549 7581

EDUCATION

Bahcesehir University — Istanbul, Turkey
Computer Engineering — Expected Graduation: July 2026

Relevant Coursework: Artificial Intelligence, Deep Learning, Web & Mobile App Development, Multimedia Systems, Formal Language & Automata, Statistics, Analysis of Algorithms, C++, Python, Java

TECHNICAL SKILLS

Programming:	Python (Intermediate), JavaScript, HTML/CSS, Java (Project-based), C++ (Project-based), Swift (Beginner)
Frontend:	React.js, Next.js, Tailwind CSS, Vite, React Hook Form, Figma, Responsive UI Development
AI & Engineering:	Reinforcement Learning, Computer Vision, Collaborative Filtering, LLM Prompt Engineering, OOP

WORK EXPERIENCE

NetworkX.ai — Remote
Frontend Development Intern — February 2026 – Present

- Translated Figma designs into fully functional, responsive user interfaces using React.js and Tailwind CSS.
- Developed and maintained reusable frontend components with JavaScript, HTML, and CSS.
- Collaborated with the design team to ensure pixel-perfect implementation of UI/UX specifications.

Bahcesehir University — Istanbul, Turkey
Erasmus Office Assistant — September – December 2024

- Assisted international students with Erasmus application processes and administrative tasks.
- Strengthened cross-cultural communication skills supporting students from diverse backgrounds.

PROJECTS

Webinar Landing Page | React.js, Next.js, Tailwind CSS — February 2026

- Built a fully responsive multi-page landing site for a client at NetworkX.ai, translating Figma designs into production-ready code.
- Implemented reusable React components with Next.js routing and Tailwind CSS, ensuring consistent UI across all breakpoints.

Highway Reinforcement Learning Agent | Python, Stable Baselines3, OpenAI Gym — December 2025

- Trained a Deep RL autonomous agent to safely navigate multi-lane highway scenarios using Stable Baselines3.
- Optimized reward shaping to significantly improve collision avoidance and lane-changing behavior.

Movie Rating Prediction System | C++, Data Structures, Algorithms — November 2024

- Implemented collaborative filtering with Cosine Similarity in C++ to predict user ratings across large-scale datasets.
- Evaluated prediction accuracy using Root Mean Squared Error (RMSE).

CERTIFICATIONS

Supervised Machine Learning: Regression and Classification — Stanford Online & DeepLearning.AI
Completed advanced foundational training in predictive modeling and algorithmic classification under Andrew Ng.

C++ Basics: Selection and Iteration — Codio via Coursera
Completed with a grade of 86%, covering variables, operators, selection statements, and loop structures in C++.

LANGUAGES

English (Proficient) | Turkish (Intermediate) | Persian (Native)
